

Downloading Patient Email Addresses

You can easily download a list of patient email addresses from the [Patient Return Rate](#) report, located on the Dashboard:

The screenshot shows the 'Patient Return Rate' report creation form. It includes fields for 'Start Date' (2022-06-20) and 'End Date' (2022-06-21). Below these are buttons for time periods: 'Today', 'This Week' (selected), 'last Week', 'This Month', 'Last Month', 'Year to Date', and 'Last Year'. A dropdown menu shows 'Alexa Hulsey' as the selected practitioner. A 'Create Report' button is at the bottom.

Select your date range and Practitioner (or All Practitioners), and click Create Report. To download your results to a spreadsheet click the download button at the top of the report:

The screenshot shows the top of the report. It says 'Patient Return Rate' with an edit icon. Below, it says 'For Alexa Hulsey' and 'Wed Jun 1, 2022 - Thu Jun 30, 2022'. A blue download button is visible, and a tooltip 'download return results' appears when hovering over it.

Your patient names and email addresses will then export to a downloaded spreadsheet, where you can sort and arrange your data:
