

Duplicate Patients

The Duplicate Patients page shows a list of patients with duplicate names. You can get to this page by clicking Duplicate Patients under Patients on the sidebar menu:

When two patients share the same name

When two or more patients share the same name, we recommend adding a middle name or initial to identify each patient. This can be done from the [Patient Profile page](#).

When one patient has created multiple accounts with their name

Sometimes a patient will create multiple accounts with their name. When this happens, you'll need to merge the accounts. To do so, first navigate to the Duplicate Patients page.

You'll see a list of duplicate patient names, including their number of past treatments, credit balance, and whether they've completed an intake form:

Duplicate Patient Names

These patient(s) have identical names. Select the patient you want to **KEEP**, click Merge and all appointments from both patients will be merged into the patient you selected.

[60] Alice In Wonderland		\$20.00	2 APTS	No Intake
[64] Alice In Wonderland			0 APTS	No Intake
