Downloading Health Records
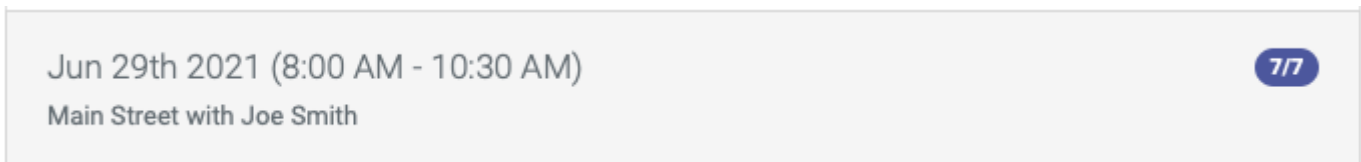

Open ACU allows you to download a CSV file of all found records in blocks or searches.

> Coming: Health records download for each patient by date range.
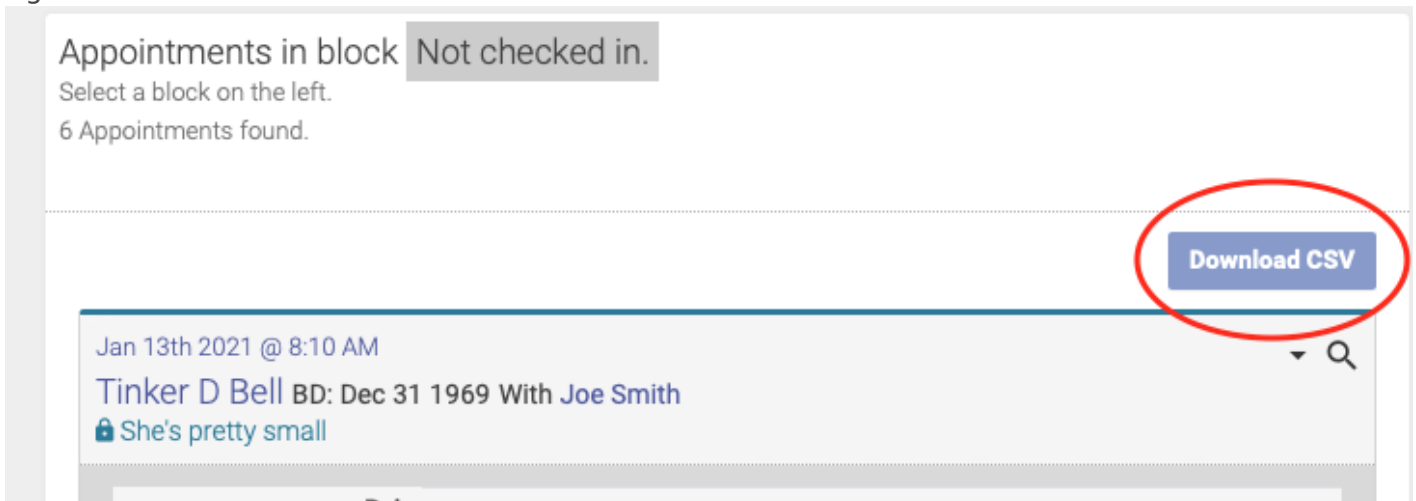

To download a block of records to CSV

Go to EHR > EHR By Block (if you are an owner you can choose the practitioner first to load their blocks)

Select a block from the column on the left

If there are any appointments you will see a button at the top right of the records loaded in the right column.

This button will download a CSV file.

The information columns in the downloaded file

These are the fields in the CSV file downloaded from the EHR.
