Printing Health Records

If you need to print a patient's health records, you'll do so from the Patient Profile page.

Once you're on a patient's profile page, click the printer icon next to the patient's name at the top of the page:

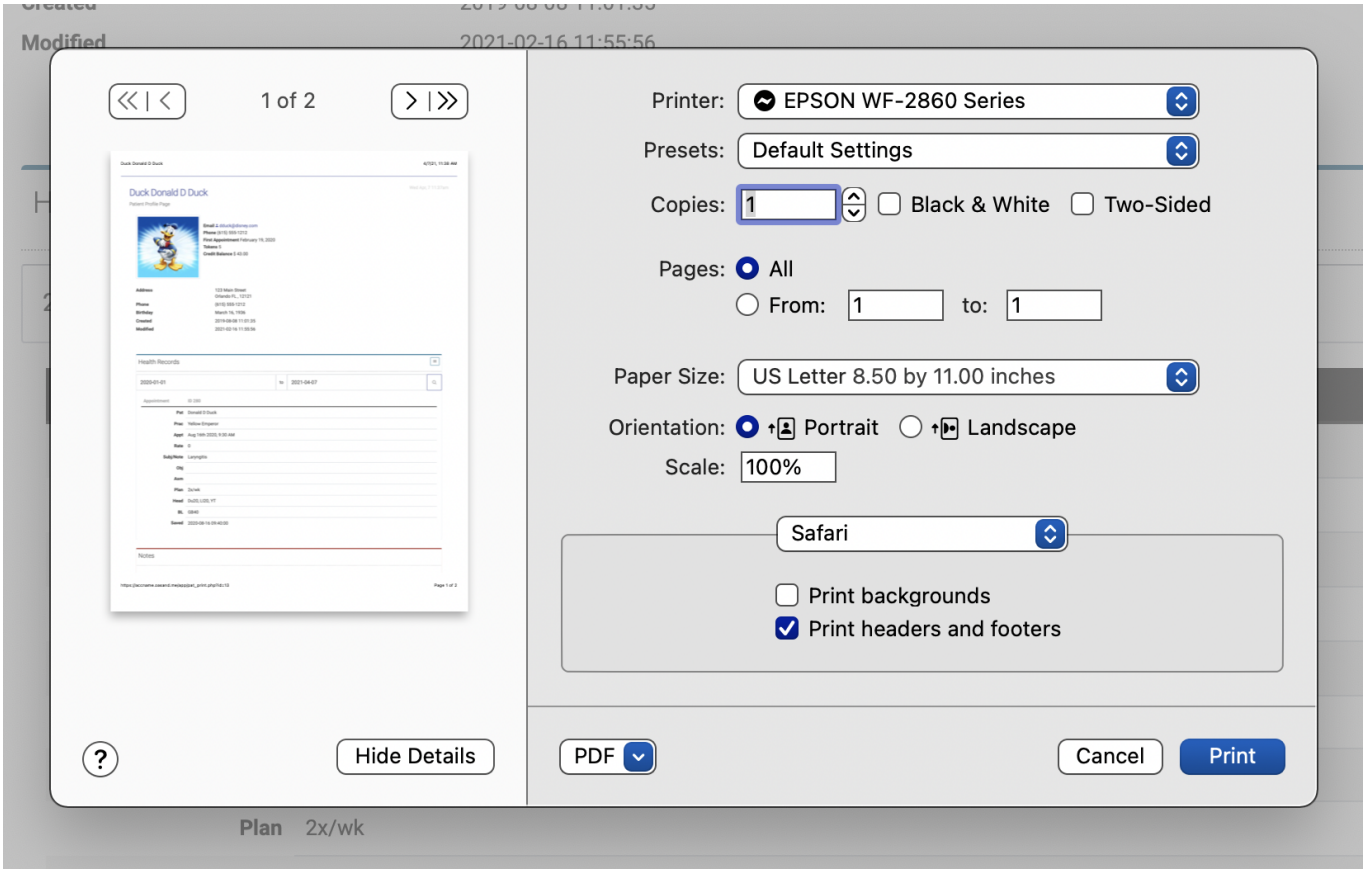

A date range search box will appear. Enter your date range and click the magnifying glass to see your search results:

The health records for your selected date range will appear below the search fields in reverse chronological order.

Click Control P to print your records:
