

Treatment Groups

Treatment groups are your point combinations. Each practitioner can create their own list of treatment groups, based on the point combinations they use most frequently. To do so, go to EHR - > Preferences.

Any time you make changes to a Treatment Group, click Save Group to save your changes.

Here's a quick video look:

To create a group, enter the group name in the Add a New Group Name box and click Save New Group:

The screenshot shows a web interface titled "Treatment Code Groups" with the subtitle "Create groups of codes to add with one click." Below the title is a horizontal line. Underneath the line is a dark blue rectangular area containing two white elements: a text input field on the left with the placeholder text "Add A New Group Name" and a button on the right labeled "Save New Group".

Once you've created some groups, you'll see a list of your groups with options to make changes to the group:

Group Name

Headache

Save the group changes

Save Group

Delete Group

Points

Points

Enter code and hit return

Group Name

Sinus

Save the group changes

Save Group

Delete Group

Points

Points

Enter code and hit return

To add points to a group, enter the code for each point and hit Return. You'll see the points for each group under the group name:

Group Name	Save the group changes
<input type="text" value="Headache"/>	<div><div>Save Group</div><div>Delete Group</div></div>
Points	Points
<div><div>LI4</div><div>LIV3</div></div>	<input type="text" value="Enter code and hit return"/>

To remove a point from a group, simply click on the treatment code for that point.

Remember that any time you make changes to a Treatment Group, click Save Group to save your changes.

To delete a group, simply click the Delete group button.
