

Treatment Groups

Treatment groups are your point combinations. Each practitioner can create their own list of treatment groups, based on the point combinations they use most frequently. To do so, go to EHR - > Preferences.

Any time you make changes to a Treatment Group, click Save Group to save your changes.

Here's a quick video look:

To create a group, enter the group name in the Add a New Group Name box and click Save New Group:

The screenshot shows a user interface for creating treatment groups. At the top, the heading "Treatment Code Groups" is followed by the instruction "Create groups of codes to add with one click." Below this, a dark blue horizontal bar contains two white buttons: "Add A New Group Name" and "Save New Group".

Once you've created some groups, you'll see a list of your groups with options to make changes to the group:

Group Name	Save the group changes
<input type="text" value="Headache"/>	<input type="button" value="Save Group"/>
	<input type="button" value="Delete Group"/>
Points	Points
<input type="text"/>	<input type="text" value="Enter code and hit return"/>

Group Name	Save the group changes
<input type="text" value="Sinus"/>	<input type="button" value="Save Group"/>
	<input type="button" value="Delete Group"/>
Points	Points
<input type="text"/>	<input type="text" value="Enter code and hit return"/>

To add points to a group, enter the code for each point and hit Return. You'll see the points for each group under the group name:

Group Name	Save the group changes
<input type="text" value="Headache"/>	<input type="button" value="Save Group"/> <input type="button" value="Delete Group"/>
Points	Points
<input type="button" value="LI4"/> <input type="button" value="LIV3"/>	<input type="text" value="Enter code and hit return"/>

To remove a point from a group, simply click on the treatment code for that point.

Remember that any time you make changes to a Treatment Group, click Save Group to save your changes.

To delete a group, simply click the Delete group button.
